

# Lost Mary BM6000: The Long-Lasting Disposable Vape Built for Everyday Use

Vaping has come a long way, and for those seeking simplicity without sacrificing performance, the **Lost Mary BM6000** by Elf Bar delivers just that. This sleek and modern disposable vape is perfect for both new and experienced users who value convenience, strong flavour, and long-lasting power in a compact design.

## Impressive Puff Count with Rechargeable Convenience

One of the standout features of the Lost Mary BM6000 is its incredible capacity of up to **6000 puffs**. Unlike traditional disposable vapes that get tossed after a few hundred uses, this one offers a longer-lasting experience backed by a **rechargeable 650mAh battery**. This feature alone sets it apart—allowing you to get the most out of every device without constantly needing a replacement.

The **draw-activated mechanism** means there's no need to fiddle with buttons or complicated settings. Just inhale and enjoy. It's designed to make vaping as straightforward as possible, especially for those who are transitioning from smoking or simply want an easy-to-use option.

## Smooth, Flavour-Rich Performance

At the heart of the BM6000's superior vapour production is its **upgraded mesh coil**. This technology ensures that every puff delivers clean, consistent flavour—perfect for those who love a rich, satisfying vaping experience. Paired with **nicotine salt e-liquid**, you'll get smoother throat hits and faster nicotine absorption compared to freebase alternatives.

The vape also includes a **2ml + 10ml refill tank** and remains **TPD compliant**, ensuring it meets safety and regulatory standards in the UK.

## Thoughtful, Eco-Friendly Design

What makes this vape even more appealing is its **detachable battery**, allowing users to dispose of the battery separately for recycling. It's a small yet meaningful step towards reducing electronic waste in the world of disposables.

### Key Features:

- Up to **6000 puffs**
- **Rechargeable 650mAh battery**
